**Location:** Gujarat

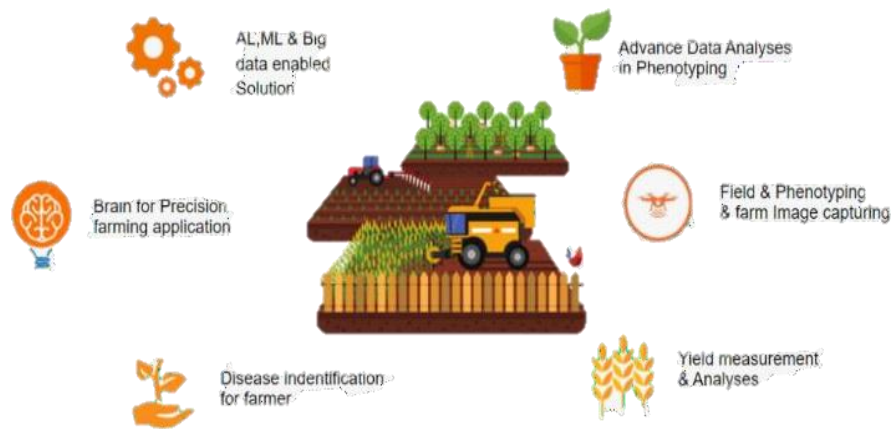

**Year of Startup Incorporation:** 2014

**Incubated in:** 2019-20 at IARI

Farmers lack reliable data for farm and disease management. The startup has developed "AgriX," a solution that provides accurate data on plant health, yield estimation, productivity status, plant growth, water level, tolerance level, disease identification, and quality of crop. Currently catering to wheat and rice growers.

Xpertnest aims to optimize plant health, yield, and resource management. Their solution boosts agricultural productivity, reducing economic risks for farmers and fostering sustainable growth in the agriculture sector.
