**Foundation Year:** 2016

**Location:** Maharashtra

**Incubated in:** 2020 at IARI

BioPrime Agrisolutions, a Pune-based startup, has developed their proprietary technology platforms, SNIPR (Smart Nanomolecules Induced Physiological Response) and Bionexus (Plant trait-modifying microorganisms).

They have developed alternative bio-organic and sustainable solutions for crop improvement, nutrition, and protection based on SNIPR technology. These next-generation agribiologics protect the crops from fluctuating weather, untimely rains, temperature stress, water stress, etc.

The agri-solution has targeted pathway modulation and high compatibility with all current chemicals available in the market.
