A precision agri-tech startup, “Satyukt Analytics,” uses remote sensing technology to provide satellite-based climate data and decision analytics.

The startup’s SaaS-based products leverage innovative technologies like remote sensing, big data analytics, artificial intelligence, and machine learning to offer end-to-end datasets along with historical data and insights for better decision-making for the agriculture sector.

It uses machine learning algorithms to generate real-time insight for multiple domains like agriculture, water resources management, healthcare, and insurance analytics for crops, earthquakes, floods, and wind.

Satyukt has 4 major product services to offer:

- Sat2Farm
- Sat4Agri
- Sat4Risk
- MRV Carbon Credit
