

**National Conference on FOOD TECH - Next-Gen Technologies for a Progressive Food Processing Sector to be held on May 29**

The Associated Chambers of Commerce and Industry of India (ASSOCHAM) is all set to host the **National Conference on FOOD TECH - Next-Gen Technologies for a Progressive Food Processing Sector** on **29 May 2025**, in **New Delhi**. As per reports, the event will focus on the role of emerging technologies in transforming India's food processing industry, which is a key part of the country's agricultural & economic framework.

Given the current high demand in the sector, along with ongoing supply chain pressures and the need for greater efficiency, the conference will focus on how modern solutions such as - automation, smart systems & digital traceability can drive progress. It will also serve as a platform for industry leaders, academics, government officials & startups to share ideas & insights, explore practical applications & discuss strategies for building a more advanced and sustainable food processing ecosystem.

**Session Details:**

- **Session 1** - The Tech Revolution in Food Processing: Trends, Challenges & Opportunities
- **Session 2** - Bridging Innovation & Industry: The Feasibility of Next-Gen Food Tech
- **Session 3** - Public-Private Partnerships in Food Tech: Building a Thriving Startup Ecosystem

Through expert discussions as well as collaborative dialogue, the conference will promote the adoption of next-generation technologies and help shape a future-ready food processing sector.
