**Year of Startup Incorporation:** 2020

Swarnim Bio Agroscience Pvt. Ltd is committed to sustainable and organic farming, reducing excessive chemical use while providing ready-to-use solutions for both pot and plot growers. Their innovative approach includes nano-tech formulations in pouches, ampules, and capsules, utilizing natural organic inputs and farm waste to enhance soil fertility and promote eco-friendly agriculture.

Their products are easy to carry and handle, making organic farming more accessible. With a focus on social, economic, and environmental impact, Swarnim Bio Agroscience has successfully increased productivity by 10% while reducing chemical input loads by up to 20%. Additionally, the company plays a vital role in generating employment in rural areas, supporting farmers and laborers at various levels.

Guided by the philosophy “KHET KHUS TO KISAN KHUS”, Swarnim Bio Agroscience is leading the way in natural organic farming, ensuring both soil health and farmer prosperity.
